## JUNIOR FRONTEND DEVELOPER

## PROFILE INFO

I've spent only 7 month learning Frontend Development, but I really enjoy it. Web Development, in general, is something absolutely new and undisclosed for me because I used to work as a doctor.

My previous experience taught me to work effectively under pressure, to handle multiply tasks and be well-organized. Also, I have experience in management, training new employees and resolving conflicts. I can easily work in team, but I am not afraid of making decisions by myself and being responsible for my part of work. I'm always enthusiastic about new tasks and love to develop and implement some 'tricky things' that help me and my colleagues to work more efficiently.

I hope, that my motivation, need for growth and learning skills will help me to change my job and my life.
